

# Cancer Diagnosis Report

## Patient Information

Name: John Doe

Age: 45

Date of Diagnosis: 10th September 2024

Diagnosis: Early-stage Lung Cancer

Stage: II

Treatment Suggested: Chemotherapy and Radiation Therapy

## Test Results:

1. CT Scan shows a 3cm nodule in the right lung.
2. Biopsy confirms malignant cells consistent with non-small cell lung carcinoma.
3. PET scan indicates no distant metastasis.

## Doctor's Comments:

The patient is diagnosed with Stage II non-small cell lung cancer. Based on current imaging and test results, the tumor is localized and has not spread to distant organs. Treatment recommendations include chemotherapy followed by radiation therapy. Surgery may be considered depending on the patient's response to initial treatments. A follow-up in 3 months is recommended.
